

## *Joseph Seaverson*

Joseph Seaverson has been diagnosed with a rare and terminal seizure disorder. Additionally, Joseph is starting to go blind. He has surpassed his Dr.'s expectations in terms of his life span thus far. He is currently 2 ½ years old. His family has struggled financially for years. The staff at Easter Seals pitched in last year and got a plane ticket for his mom to take him to her home country so that his grandparents could see him for the first time before he passes away. Apparently dad just lost his job, so the financial troubles that the family has experienced will be getting even worse. Joseph has extensive medical expenses due to his condition, so any help at all whether clothing, toys, groceries, financial is greatly appreciated by this family.
